PATENT APPLICATION

entitled: FASTENING FOR EARRINGS

in the name of: Gérard BONIFACIO

assigned to: ETABLISSEMENTS CHARLES GARNIER

ABSTRACT OF THE DISCLOSURE

An earring comprises a decorative ring part having a first end portion to which is connected a fastening post comprising a fastening portion intended to be inserted in the hole pierced in an ear, and a fastening-free end portion. Said fastening portion is inclined with respect to the first end portion by an angle α corresponding to an angle of separation of the ear lobe bearing said earring with respect to the cheek, forming a bend, so as to put the earring straight with respect to the cheek.
